### Product Description

Fluff Pulp Disposable Underpad with Free Sample Made In US America

**Product Description:**

Our Product Introduction

Our Disposable incontinence underpads are made with three layers of highly absorbent materials, ensuring that any leaks or spills are contained and absorbed quickly. The top layer is made from a soft, non-woven fabric that is gentle on the skin and helps to wick away moisture, keeping the user dry and comfortable. The middle layer is made from a super-absorbent polymer that can hold up to 1500 ml of liquid, effectively locking in any moisture and preventing leaks. The bottom layer is made from a waterproof material that ensures that any liquid stays contained and does not seep through to the bed.

These Disposable bed underpads come in a classic blue color, making them easy to spot and ensuring that they blend in seamlessly with any bedding. They are suitable for use every day, providing a reliable solution for those experiencing incontinence. With a size of 30x36 inches, they are large enough to provide ample coverage and protection while still being easy to handle and dispose of.

As a company, we understand the importance of trying out a product before committing to a purchase.
